## IF THE EU WILL NO LONGER EXISTS

by stars group

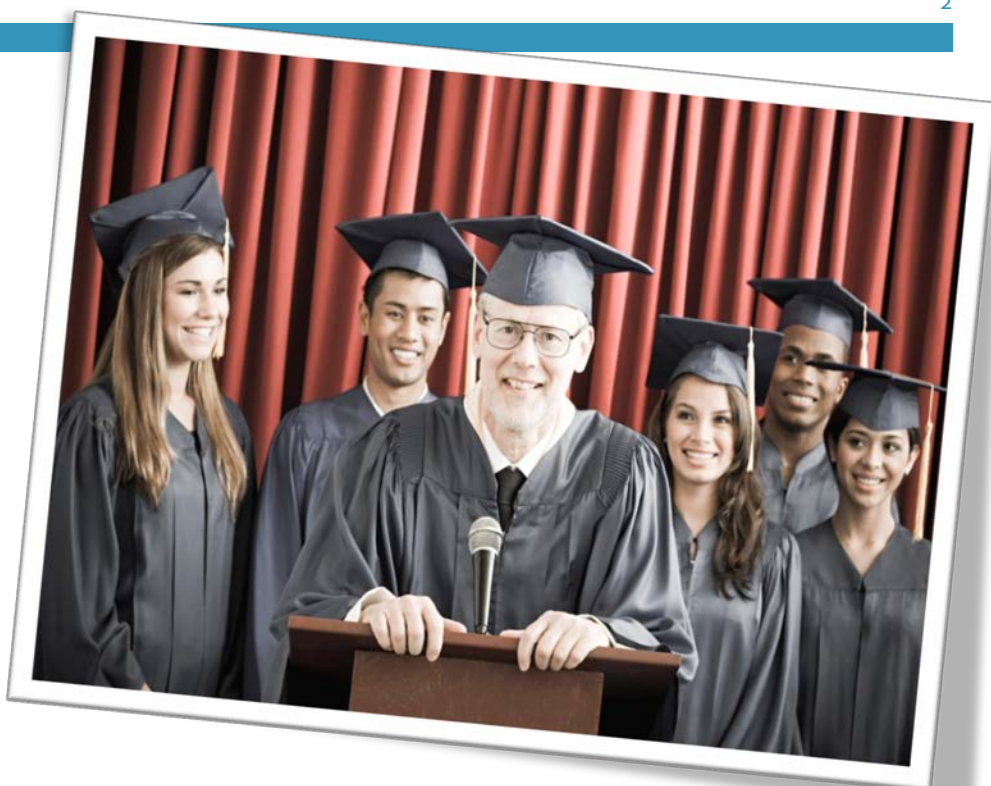

Hi, my name is Stefan, I live in Romania and I have 23 years old and I know the "European Citizen life" since 1 January 2007. Honestly, I don't remember to much details until then but I'm sure the life for Romanians wasn't so white and faire. Since 2007 Romania becomes a UE country and things started to change in good for citizens and Country.

A life without UE will be harder for all of us in things that involved: Travel, Work and Study, Right and Values.

### Travel

Let start with traveling, almost every person has the desire to visit and see something new. In present that is easy, your only concerns are money and time (when it's about the UE territory).

The costs for traveling will be more expensive and the traveling plan should be thinking in advance. It would necessary to obtain a Visa for every pass outside the borders and thing take time and nobody can ensure you will obtain it 100%. Before living the country, you should go and exchange the money in the national currency of your destination which involves time and losing money because of commissions that every bank applies. Every citizen of UE can have an European Health Insurance Card that can be purchased very easy for free. Without an EU you should get a medical insurance that cost.

### Work and Study

EU brings the biggest opportunities in specially for young people when it's about work or study in a domain/field that is impossible in your country.

Without European Union is possible to work outside the borders with a certificate recognized by the authorities in that country, otherwise you are not allowed to practice in that profession.

Programs and Project like Erasmus will no longer exist, and this is a huge lost in communication and learning.

### Rights and values

The UE is based on common values and fundamental rights which were loid down for all the European citizens in the "Charter of fundamental Rights of the EU".

If the thinks will be changed, we will be treated differently depending our nationality.

We as EU citizens share common values and rights that protect us and at the same time we can enjoy our linguistic and cultural diversity.

The European Union is not an abstract entity, it is built with our decisions.

Everyone should vote because...

Opinions of the people:

## Alberto from Spain:

"I think that everyone should vote because we have that right. If you disagree for example with all the political parties, you can vote in white. For me is very important to vote and should to be obligatory! This is a way to be against your country's policy."
